

FEMA REGION X TRAINING OPPORTUNITY

FEMA

L317 Comprehensive Data Management for Hazus-MH

Date:

March 26-29, 2013

Location:

Tacoma, WA

Course Description:

The course is designed for officials responsible for integrating local data into the Hazus database structure. The course will focus on using the Comprehensive Data Management System to update Hazus information. The course will include in-depth discussion of the methodologies that were used to develop and compile the Hazus provided inventory. A significant portion of the course will be devoted to exploring a variety of strategies and techniques for updating both site-specific and aggregate inventory with local data. The course will also help participants effectively prepare for their own data updating projects by identifying those inventory elements that have the most impact on the estimation of losses for flood, earthquake, and hurricane analysis events.

Target Audience:

The course is recommended for GIS analysts, database administrators, and others who are responsible for integrating local data into the Hazus-MH database structure. Experience with ArcGIS and/or Hazus are required for this course.

Funding:

Tuition is free for those accepted; there are no travel/salary stipends available for this offering and all incurred costs are the responsibility of the attendee or sending organization.
